Vybrané typy komponentov AUDION je možné si objednať vo vylepšených „UPGRADE“ kategóriách priamo z výroby.

Existujú 3 kategórie vylepšení. Triedy vylepšení sú:

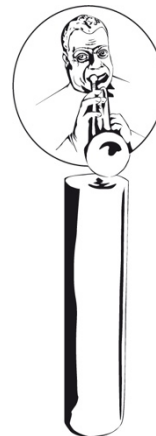

Trieda **Insignia**, ktorá používa plne striebornú káblovú audio cestu, lepšie odstupňované komponenty v audio ceste, tantalové rezistory na kritických miestach a terminály WBT.

Trieda **Excelsior** zahŕňa to isté ako vyššie uvedené, ale s teflónovými/cínovými fóliovými V-kondenzátormi, interným strieborným káblovým prepojením, 43-cestným stupňovitým atenuátorom, lepšími napájacími kondenzátormi a WBT RCA.

Signature Reference používa to isté ako trieda Excelsior, ale dodáva sa s plne striebornými káblovými audio a uzemňovacími cestami, striebornými fóliovými kondenzátormi v oleji, výstupnými transformátormi s pevným striebrom, striebornými RCA a spojovacími kontaktmi.

V oboch triedach existujú možnosti pre sekundárne vinuté striebro alebo primárne a sekundárne vinutia na výstupnom transformátore.

Ceny upgradových kategórií sú veľmi volatilné – pred objednaním sa informujte.
